## DETAILED ACTION

***Note: This is in response to Pre-Appeal brief request filed 12/13/2006.***

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Wallace (U.S. 6,468,284).

Wallace discloses the claimed invention in figures 1-7 and (col. 5, line 50 to col. 7, line 42), an obstetrical vacuum (10) having a bell-shaped vacuum cup (12), a hollow stem (16), and a separate handle grip (24) with a pull-sensing grip (at 26) detachably connected to said forceps; means for electronically measuring the magnitude of extraction forces exerted on said grip (at 26) (**col. 3, lines 3-7 and col. 3, lines 17-23**), wherein the measuring means (70) is disposed within said handle (24); means (56) for transmitting data regarding measured extraction forces and means (col. 7, lines 17-19) for receiving said data regarding measured extraction forces; a strain gauge (52); and means (col. 7, lines 36-42) for generating an alarm comprises a speaker; wherein the means for receiving the extraction forces and the graphic representation of the extraction forces of

Art Unit: 3734

Wallace device, is inherently capable of being wireless to a lap top computer with specific software.

### ***Response to Arguments***

Applicant's arguments filed 03/21/2006 have been fully considered but they are not persuasive. With respect to claims 1, 5, and 17, Wallace discloses means for electronically measuring the magnitude of extraction forces exerted on said grip (at 26) as described in (**col. 3, lines 3-7 and col. 3, lines 17-23**) patent to Wallace. Examiner disagrees with Applicant's remarks and has maintained the grounds of rejection under 35 U.S.C. 102 (e) as being anticipated by Wallace '284 for the reason as set forth in the office action as shown above.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
